11-13mo community screening (MUAC measurement and verbal consent) N = 2110

34-38mo community screening (MUAC measurement and verbal consent) N = 1350

Excluded:(N = 1045) Reasons: Did not meet MUAC range, untested as study reached target, refusals

Excluded: (N = 780) Reasons: Did not meet MUAC range, untested as study reached target, refusals

MUAC measurement in range for possible MAM (11-14cm) N = 865

MUAC measurement in range for possible well-nourished (> 14cm) N = 200

MUAC measurement in range for possible MAM (11-14cm) N = 570

Excluded: (N = 323) Reasons: Lack of interest, logistical issues, or unavailability

Excluded: (N = 91) Reasons: Non-response, family refusal, relocation

Excluded: (N = 343) Reasons: Refusal, unavailability, relocation

Clinic screening N = 542

Clinic screening N = 109

Clinic screening N = 227

Excluded: (N = 383) Reasons: Z-score not matched (362), specimen denied (20), Illness (1)

Excluded: (N = 34) Reasons: Z-score not matched (27), specimen denied (3), congenital malformation (2), enrolled in another trail (1), family will relocate within next 3 years (1)

Excluded: (N = 152) Reasons: Reasons: Z-score not matched (146), specimen denied (4), congenital malformation (1), enrolled in another trial (1)

Eligible for enrollment N = 159

Eligible for enrollment N = 75

Eligible for enrollment N = 75

Excluded: (N = 7) Reasons: withdrawal of consent (2), relocation (2), failure to attend baseline visit (3)

Excluded: (N = 5) Reasons: withdrawal of consent (1), failure to attend baseline visit (4)

Excluded: (N = 0)

Enrolled in MAM intervention cohorts + Baseline (12mo) visit N = 152

Enrolled in well-nourished cohort + Baseline (12mo) visit N = 70

Enrolled in MAM outcome ref. cohort + Baseline (36mo) visit N = 75

Randomization

Standard-of-Care Feeds + PS Stimulation N = 77

Enhanced Feeds + PS Stimulation N = 75

Primary analysis (Neurological outcomes)

Family Withdraw: N = 1
Migration out of area: 4
Fussiness Bayley: N = 2
Anthro not collected: N = 2

Parent Withdraw: N = 2
Migration out of area: 1
Fussiness Bayley: N = 1
No-show Bayley: N = 1
Anthro not collected : N = 2

Parent withdraw: N = 5
Anthro not collected: N = 4

2-year-old follow-up visit N = 70 Bayley; N = 70 Anthro

2-year-old follow-up visit N = 70 Bayley; N = 70 Anthro

2-year-old follow-up visit N = 65 Bayley; N = 61 Anthro

Migration out of area: N = 1
Parent Withdraw: N = 4

Parent Withdraw: 1

Parent withdraw: N = 3
Anthro not collected: N = 1

3-year-old follow-up visit N = 68 Bayley; N = 67 Anthro

3-year-old follow-up visit N = 71 Bayley; N = 69 Anthro

3-year-old follow-up visit N = 62 Bayley; N = 57 Anthro

Dataset-wide exclusions: < 2 valid Bayleys: N = 5

Dataset-wide exclusions: < 2 valid Bayleys: N = 3
< 2 valid Anthro: N = 2

Dataset-wide exclusions: < 2 valid Bayleys: N = 5
< 2 valid Anthro: N = 3

Dataset-wide exclusions: Parent withdraw before Bayley: N = 4

Included in Analyses
N = 71 Bayley Longitudinal
N = 68 Bayley Cross-Sectional
N = 77 Anthro Longitudinal
N = 67 Anthro Cross-Sectional

Included in Analyses
N = 72 Bayley Longitudinal
N = 71 Bayley Cross-Sectional
N = 73 Anthro Longitudinal
N = 69 Anthro Cross-Sectional

Included in Analyses
N = 65 Bayley Longitudinal
N = 62 Bayley Cross-Sectional
N = 67 Anthro Longitudinal
N = 57 Anthro Cross-Sectional

Included in Analyses
N = 71 Bayley Cross-Sectional
N = 75 Anthro Cross-Sectional
